

## Kyтин Protect Antimicrobial

HIGH PERFORMANCE  
100% GREEN WATER BASED  
POLYURETHANE SEALANTS

---

Antimicrobial  
Antiviral  
Zero VOCs  
Water Based  
Non-Flammable  
Chemical Resistant  
Solvent Free

**QQ Innovations Kyтин Protect Antimicrobial** took years of research & development to perfect by synthesizing them into a water based solution that bonds on a molecular level. Working intimately with our team, we have developed a high performance water based technology in this coating that is solvent free, antimicrobial, antiviral, zero VOCs, and years ahead of its time. **Our commercial antimicrobial products are the first of its kind.**

**QQ Innovations Kyтин Antimicrobial Protectant** is a combination of 12 distinct antimicrobials and anti-fungals, synthesized together to form a unique capability for destroying a wider spectrum of bacteria, viruses, and fungi, including C-diff and MRSA staph (some of the hardest to kill at spore level). **Our products surpass any other stand alone antimicrobial solution.**

---

**QQ Innovations** is providing the market with advanced water-based antimicrobial products and processes preventing the spread of infectious diseases, and the growth of bacteria, fungi, mold and algae/mildew.

**QQ Innovations** technology is a completely water-based (non-solvent) antimicrobial solution developed for commercial antimicrobial sealants, detergents & cleaners.

**QQ Innovations** is uniquely on the cutting edge of water-based bio-technology and products. We replace petroleum and solvent based products (ie: plastic, rubber, foam, coatings, cleaners, detergents, and hand wash) with our 100% green water-based antimicrobial solutions.

**QQ Innovations** Antimicrobial Protectants active water-base ingredients are infused into all of our products at a molecular level, providing extended durability and optimum longevity.

### Customer Success Stories:

Queen Mary  
Six Flags Hurricane Harbor - Taboo Tower  
Universal Studios - Wizarding World of Harry Potter  
Six Flags Magic Mountain - Goliath Roller Coaster  
Walt Disney World - ESPN Wide World of Sports  
Walt Disney World - Roller Coaster Waterslide  
Walt Disney World - Cat Cora Restaurant  
University of Texas Arlington  
Industrial Equipment - Bottom Dump Trailer  
Multi-Level Parking Garage - Floor  
Exterior Parking Garage - Solar Panel Support Structure  
Niagara Falls Memorial Medical Center - OR Room

## **QQ INNOVATIONS ANTIMICROBIAL PROTECTION**

lasts for years with our antimicrobials remaining active for the life of our sealant coatings and it molecularly bonds without leaching. The benefits of QQ Innovations Antimicrobial Protectants are multifold:

- No more need for stripping and waxing surfaces. This will save in a ten year period ten times the cost of stripping and waxing. It will pay for itself in 1 to 2 years.
- No buffing or waxing required. No buffing machine needed.
- Fills cracks and provides a smooth even surface. Will level the surface over existing VCT flooring. No removal of existing floor needed. The total install would save 50% and gives antimicrobial protection.
- Slip resistant, chemical resistant, and non-flammable. QQ Innovations antimicrobial agents will not break down under harsh chemicals.
- Metal surfaces require only a single coating without requiring the use of primer and saves on labor cost. A single coat and you are done! UV protected for ten years and it will hold up in harsh environments.
- No fumes are emitted, and no need for respirators.
- C. diff and MRSA will not survive when in contact with QQ Innovations antimicrobial coating. A non-leaching child safe antimicrobial that eliminates at the spore level. Makes any hospital, food processing facility, and hotel safer.
